

# Vermont Sunlight Comparison

State	Sun Hours Per Day*
Arizona	5.7
Florida	5.0
Vermont	4.1
Germany	3.0

**Yes! We do have enough sunlight in Vermont.**

## Interesting Facts:

- Germany is the world leader in installed Solar PV.
- Germany is located farther north than Vermont.
- Germany is cloudier than Vermont.
- Cold temperatures actually improve the performance of photovoltaic (PV) power.

Yes, you can make a significant portion of your power from your own solar electric system. We have many clients here in Vermont that produce from 50% to 100% of the electricity they use in their homes with their own PV power systems.
